Att. Dr Julien Janson

Subjects: preliminary results of the pilot study aimed to evaluate the efficacy of the Lightwave machine/Patch.

Dear dr. Janson,
here below I report the data obtained during the pilot study aimed to evaluate the efficacy of Lightwave machine/Patch.

RESULTS (% variation vs. T0)

SKIN ELASTICITY	T30 mins (1)	T24h (2)	T7 dd (3)	T14 dd (4)	T28 dd (5)
Lightwave machine/Patch	+14.9%	+18.5%	+11.9%	+14.7%	+17.5%
Hyaluronic acid mask (tissue not tissue)	+2.8%	+4.7%	+8.1%	+7.2%	+9.7%
WRINKLE VOLUME					
Lightwave machine/Patch	-3.6%	-2.1%	-8.4%	-10.5%	-16.3%
Hyaluronic acid mask (tissue not tissue)	-2.2%	-1.8%	-4.8%	-6.9%	-9.1%
SKIN WRINKLEDNESS					
Lightwave machine/Patch	-4.8%	-7.6%	-10.2%	-14.5%	-21.3%
Hyaluronic acid mask (tissue not tissue)	-1.1%	-5.4%	-6.1%	-7.2%	-10.3%
SKIN SMOOTHNESS					
Lightwave machine/Patch	+10.2%	+6.1%	+16.1%	+20.3%	+25.8%
Hyaluronic acid mask (tissue not tissue)	+5.1%	+3.8%	+10.2%	+14.1%	+16.7%

Comments
The use of Lightwave machine/patch determines an improvement of skin elasticity and skin microrelief bigger than that determined by the tissue not tissue hyaluronic acid mask. This results are clinically evident starting from the 14th day of treatment.

Legend
(1) 30 minutes after 1 use - (2) 1 hours after 1 use - (3) 24 hours after 3 use - (4) 24 hours after 5 use - (5) 24 hours after 8 use
