ELITE LT 2880

Light based success

LIGHTWAVE's Flagship Tri-Color System to Address All Your Cosmetic Needs

Skin Rejuvenation - Dermal Repair - Post Recovery - Acne - PDT

LIGHTWAVE's flagship LED system, the ELITE LT 2880 is our most sophisticated and versatile Tri-Color LED light therapy system. This advanced system offers the most features of any LIGHTWAVE system and is the clear choice for skin care professionals. Our technology has been validated by receiving 5 FDA clearances, significant scientific data, years of field service and a commitment to excellence.

The ELITE LT system utilizes up to 5280 powerful non-invasive LEDs of proven Red (630nm), Infrared (880nm) and Blue (420nm) wavelengths without changing heads. Our multi-wavelength platform system makes it possible to address a variety of skin conditions ranging from fine lines, wrinkles, flaccid skin, and dermal repair to acne and PDT treatments.

The ELITE LT LED panel is equipment with 2880 LEDs, has a large coverage area, is flexible, light weight and powerful, making it simple for adjustment and placement. It is completely hands-free during operation and requires minimal user interaction; insuring proper exposure and dosage during each and every treatment.

The main control unit is equipped with a large LCD screen, control panel, software and 3 device sockets. The user interface and software are simple to operate and offers preset protocols, as well as customizable protocols, to take the guess work out of each and every treatment.

All of our systems are extremely durable, built to medical grade standards and utilize the highest quality commercial components available; which means many years of reliable service. Additionally, our modular design allows for painless service and upgrades, so you won't be left with obsolete equipment.
