Re·Act PRO 2880

Light based success

Affordable Professional Tri-Color System to Address All Your Cosmetic Needs

Skin Rejuvenation - Dermal Repair - Post Recovery - Acne

LIGHTWAVE's advanced entry level LED system, the RE·Act PRO LT2880 is a sophisticated and versatile Tri-Color LED light therapy system. This affordable system offers many of the features of our flagship LIGHTWAVE ELITE series, but without the price tag. Our technology has been validated by receiving 5 FDA clearances, significant scientific data, years of field service and a commitment to excellence.

The RE·Act PRO LT2880 system utilizes 2880 powerful non-invasive LEDs of proven Red (630nm), Infrared (880nm) and Blue (420nm) wavelengths without changing heads. Our multi-wavelength platform system makes it possible to address a variety of skin conditions ranging from fine lines, wrinkles, flaccid skin, and dermal repair to acne and PDT treatments.

The RE·Act PRO LT2880 LED panel has a large coverage area, is flexible, light weight and portable, making it simple for adjustment and placement. It is completely hands-free during operation and requires minimal user interaction; ensuring proper exposure and dosage during each and every treatment.

The main control unit is equipped with a large LCD screen, control panel, software and device socket. The user interface and software are simple to operate and offers preset protocols, as well as customizable protocols, to take the guess work out of each and every treatment.

All of our systems are extremely durable, built to medical grade standards and utilize the highest quality commercial components available; which means many years of reliable service. Additionally, our modular design allows for painless service and upgrades, so you won't be left with obsolete equipment.

RE·Act PRO LT2880

Includes:
Main Unit with 1 Socket
LED Panel (2880 LEDs)
- 630nm Red
